EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology

Bachelor of Technology in Computer Science

Hyderabad, IN

July 2024

FIITJEE

Intermediate

Hyderabad, IN

June, 2020

K.V.2. GOLCONDA

Matriculation

Hyderabad, IN

May, 2018

SKILLS

Programming Languages: JavaScript (ES6+) | TypeScript | Java

Front-End Development: React JS | React Native | HTML5 | CSS3 | DOM Manipulation | SASS/SCSS | HTTP | JavaScript | Responsive Web Design | Component-Based Development

Back-End Development: MongoDB | Prisma | Firebase | Supabase | Express | Postman

UI Frameworks: Material-UI | Tailwindcss | Bootstrap | Semantic UI React

Version Control & Collaboration: Git | GitHub

RESTful APIs: Axios | Fetch API

Deployment: Netlify | Vercel | Cloudflare Pages | Cloudinary | Imagekit

Development Tools: Visual Studio Code | Browser Developer Tools (Chrome DevTools)

Problem-Solver

Other Tech Skills: DSA (Java) | Python | Quality Coding | npm

Soft Skills: Time Management | Flexible and Adaptable | Good Communication | Commitment

PROJECTS

NewWorld Properties | *React, Express, Mongoose, Firebase, Imagekit.io, TailwindCss, JWT, Multer*

- A full stack property listing web app with advanced authentication, advanced search functionality, image upload.
- Production grade practices like encryption and decryption of passwords and image-caching during upload along with proper state management using Redux-Toolkit.
- Code repository on [Github](#)

AasPaas | *Nextjs-13, Tailwindcss, Google Places Api*

- A web app to show popular places near the user's location.
- Integrated Google Maps to power the search functionality and display search results on an interactive map.
- Code repository on [Github](#)

Chattie | *React Native, Palm Api, Expo-gifted-chat*

- Developed an AI-based chatbot application utilizing the Palm API.
- Implemented a wide range of avatar bot faces to enhance the user experience.
- Created a conversational interface allowing users to ask the chatbot any question and receive accurate answers.
- Code repository on [Github](#)

Full Stack Code editor | *React, Firebase, Tailwindcss, Redux*

- A full stack code editor app with beautiful animations and responsiveness to enhance UI/UX.
- Users can authenticate, share their work and run code snippets in real time.
- Code repository on [Github](#)

Other Projects: Developed various websites using HTML, CSS, JavaScript, React, and React Native, including Video Call App, Color palette generator, Meesho frontend clone, Airbnb frontend clone, text-to-speech and speech-to-text app, weather app, pomodoro app, and photography site. Check out my projects at github.com/utk145

CERTIFICATIONS

- Completed the InternPe Web Developer Internship Program, demonstrating proficiency in web development skills.
- Received certification from IIT KANPUR in PHP with MySQL, showcasing backend development knowledge.
- Skyscanner Virtual Experience Program.
